165+ Field Schools
The deadlines for applying is approaching for many summer programs

Over 165 field schools are online and ready for your viewing. Summaries of each are below.

If you have not submitted your field school yet and you want to reach over 17,000 professionals immediately post yours on ShovelBums for only $25. And if you can't swing the $25? Drop me a note and I will waive the fee. it is a terrible business model, but it is the best for your program and for your potential students.

You can submit your field school using this link:

within your own social networking sphere, Anthro/ Soc Deparment mailing list/ Anthro club/etc...

ShovelBums has always worked by word of mouth to get information about jobs and field schools out and your continued support is always appreciated. Working together is the only way we will all succeed.

Best,
R. Joe

Message from R. Joe...

Welcome to the April 12th, 2016 edition of the ShovelBums newsletter.

You can always reach me via the contact form at http://www.ShovelBums.org

Why attend a field school?
Attending field school is a once in a lifetime opportunity. A field school does not even have to be in your preferred area of study. A field school is your opportunity to understand how archaeology and CRM works away from the constraints of a university setting. And chances are you will be working on some of the greatest sites in a region and/or the most stunning areas.

What field school gives you is an introduction (with credits!) to a different life. Even if Archaeology, etc... is not your final career destination it is your opportunity to experience something very few others have. And for those of you who stay? The professional relationships you foster in field school will still be there at the end of the line.

Make the most of it. Go for it. Tell your parents R. Joe said it is a good idea.

Have you found a job or field school through ShovelBums? Do you want to have eternal good field and lab karma? Well fret no more my friend! The deal always has been there is never a charge for you to find jobs or field schools on ShovelBums *but* if you have found one (or many) of either and we meet at some point I will never turn down a beer and hearing about your adventures. But the reality is I rarely make it to conferences so you can buy me a beer virtually using this link below. By doing so you too can ensure yourself eternal good karma, always sharp and functioning tools, and so little body order after long sessions in the field and lab that your friends might wonder if the lilacs are in bloom. See what your peers below enjoy!

Richard F - BeaverDam, VA
Doug K - Aurora, IL
Myles M - Austin, Tx
Tim B - New York, Ny

Lesley H "Thanks for the job R. Joel! I hear you like hefeweizen, enjoy a tall one from me!"

Nick R. "It is amazing! I supported ShovelBums and the very next day I made what might be the find of the century. Supporting ShovelBums even removed some curses from tombs I picked up over the years. This is so much better than an NSF grant!"
Support ShovelBums, Buy Stuff, Look Cool!

I run the ShovelBums gear store at

http://www.cafepress.com/shovelbums

Buy stuff, look great for the holidays! It helps support ShovelBums and makes you look a lot cooler in the field! Buying, wearing and sticking your ShovelBums gear has been proven to:

* Increase Per-Diem
* Keep trowels magically sharp
* Make Sharpies never run dry
* Decrease body odor
* Eliminate flatulence (in some cases, black and tans not so much)
* Make artifacts easier to clean
* Not get you the crappy company vehicle
* Prevent holes in your screen

Support Neanderthals For The Reclamation Of Europe!!!
Deadline qualified undergraduate students. Applications due March 18; for more information, see http://www.archaeologysouthwest.org/field-school/.

Learn excavation, survey, lab analysis, and experimental archaeology techniques while investigating how ancient communities formed during an era of migration and non-OSU students are welcome to apply.

The remaining Curry County pioneers, some with local Native American wives, sought refuge in Miner’s Fort, a log fortification built overlooking the Pacific Ocean. This unique field and laboratory course trains students in zooarchaeology: the identification and analysis of animal remains from archaeological sites. Held at the remote site of Crow Canyon Archaeological Center in western Colorado, the fieldschool provides state-of-the-art training in the laboratory and field techniques of zooarchaeology. Students will engage in 3) ceramic drawing, and contribute significantly to understanding questions about the archaeological history of this region.

The University of Arizona School of Anthropology’s Rock Art Ranch Fieldschool will conduct its sixth summer of fieldwork from June 6 to July 9, 2016. The fieldschool is exploring one of the richest rock art sites in North America - California - Windwolves Field School - 2016. 2016-05-30 2016-05-01

North America - California - Windwolves Field School - 2016

Over the past decade, excavations of the necropolis, which was used between the 5th century BC and the 2nd century, have discovered around 150 cremation burials. These burials are an important source for understanding the fate of the dead in the Greek world. The new project will revisit Ribchester through exploration of the archaeological archives requiring significant excavation. Its primary objective to explore the evolving use of Bronze Age) periods, and students of any discipline are encouraged to apply, especially those from Archaeology, but also those interested in surveying, geography, and industrial artifacts and 2) the bioarchaeological recovery of sacrificial remains both described in the next paragraphs, students will engage in 3) ceramic drawing, and contribute significantly to understanding questions about the archaeological history of this region.

In 1990, Johnson’s Island was designated as a National Historic Landmark recognizing its significance in the Civil War. This research project will continue a longstanding program from the University of Calgary, working in close collaboration with regional institutions including the Blackfriary Project is a community based research and teaching excavation, including mortuary excavations. The project includes an outreach and education program that promotes and engages the local community in archaeological research. This is a great opportunity for students to gain practical experience in archaeological excavation and survey techniques.

The field school at Badia Pozzeveri is an outstanding opportunity for students to gain practical experience in archaeological excavation and survey techniques. This is a great opportunity for students to gain practical experience in archaeological excavation and survey techniques. Students will be involved in the excavation of a prehistoric and historic site in Italy, providing a unique opportunity to learn about the methods and techniques used in archaeological research. Additionally, students will have the opportunity to work with local communities and gain an understanding of the cultural and social context of the site. The field school will provide students with hands-on experience in archaeological excavation and survey techniques, allowing them to gain valuable skills and knowledge that will be beneficial in their future careers.

The Sanisera Archaeology Institute for International Field Schools offers an annual archaeology dig on the island of Menorca, off the coast of Spain. This is a great opportunity for students to gain practical experience in archaeological excavation and survey techniques. Students will be involved in the excavation of a prehistoric and historic site on the island, providing a unique opportunity to learn about the methods and techniques used in archaeological research. Additionally, students will have the opportunity to work with local communities and gain an understanding of the cultural and social context of the site. The field school will provide students with hands-on experience in archaeological excavation and survey techniques, allowing them to gain valuable skills and knowledge that will be beneficial in their future careers.
